

CorSource Cares!

A few years ago our company knew it wanted to make a difference in the community, but didn't quite know where to start; that is where our relationship with Entrepreneurs Foundation of the Northwest began in early 2006.

Over the years our contributions to the community have grown; in 2007 our return to the community totaled \$17,880, and in 2008 our return to the community increased to \$19,862 despite the tough economic downturn. We truly hope to give that figure a run for its money this year!

CorSource knows the value of **Corporate Social Responsibility** and allows 8 hours of paid time for each office employee to donate their time in a volunteer capacity. These hours are to be used during the workday. We also greatly value our employees' willingness to donate time to other charitable organizations on their own time as well!

We invite you to check out the Entrepreneurs Foundation of the Northwest on their website at www.efnw.org to see how they help small to mid-sized businesses give back to their community.

Community Involvement Newsletter Mid-Year 2009

Quarters 1 & 2 were busy for our Community Involvement Team!

Used Clothing Drive

New Avenues for Youth helps homeless and at-risk youth in Portland and SW Washington develop skills to leave street life forever. Their program consists of Stabilization, Outreach & Engagement, Early Intervention & Prevention, and Skill Building.

CorSource Employees donated gently used professional clothing for these youth to wear to job interviews.

Rebuilding Together

Once again we partnered with this very worthwhile organization helping a very kind disabled couple. Like last year, we took on a very large project that spanned more than the standard 5½ hours Rebuilding Together requests. Our crew of 18 stayed 9 hours the first day and came back the next week for another 9 hours! We cleared the yard of all overgrown bushes and vines, pruned a few trees and mowed and weeded. The exterior of the house was painted, and the interior of the house got all new carpet/pad, patch and paint on all the walls, and a room air conditioner was installed. The kitchen got all cabinets re-stained and a new linoleum floor. The bathroom got new linoleum and a tub surround with some added handicap braces for the homeowners.

We were rewarded with hugs and tears of joy from the happy couple.

Friends of the Forest

Our employees met at the Sandy River Delta to widen frequently traversed trails & maintain the newest volunteer-built gravel trail that winds through the Sandy River Delta to the Confluence Project Bird Blind installation. We were pleasantly treated to an informal presentation about the Sandy River and Columbia River Gorge during lunch!
